

Tea-ToGo by amapodo #TEAFVS

Double-hulled amapodo Tea-ToGo glass with tea strainer and a real genuine bamboo cap

amapodo TEAFVS - the Tea-ToGo glass for true connoisseurs

Convenient. Sustainable. Trendy. The amapodo TEAFVS for Tea-ToGo fits well into the current times. A tea glass with a double-hulled glass for a tea experience in a flexible way. Everywhere. As we know the eyes savor when having a tea. So they do using the Tea-ToGo glass for tea enthusiasts, who appreciate exclusivity. The combination of the double hulled, high-grade borosilicate glass with the natural material bamboo reminds us of the Far-Eastern aesthetics. Jasmine Tea, Yellow Tea, Black Tea with lychee - every tea has its own unique colour. TEAFVS Tea-ToGo wears the colour of your preferred tea openly: A visual aperitif.

amapodo TEAFVS - trendy attribute of a mobile way of life

No time for breakfast and in favor of a possibility for a tea to go?

The filling of the tea glass for your treat to go is done at once: Just put tea, tea leaves or fruit tea into the tea filter of the tea bottle and top it up with hot water. Put on the bamboo cap and close it with a quarter turn to the left. You can put the tea leaves either to the tea filter or directly into the glass. In this case the simple filter is working like a strainer. A fascinating optical effect. You can observe the floating elements of the tea change the color of the water. Now the day can start!

Tea-ToGo with safe handling. Quite simply.

Our high-grade and shockproof thermo tea glasses made of borosilicate glass are made in several process steps. Their double-hulled glass walls have an insulating effect. Would you like to enjoy your tea shortly after the preparation in the teamaker you should be aware - he is still very hot. Amapodo TEAFVS retains a convenient drinking and enjoying temperature of your favourite tea for approx. 2 hours. The cap made of bamboo wood is furnished with a gasket. For a carefree transport of the Thermo Tea Maker in the handbag or in a backpack when you are on the way. Our TEAFVS Thermo-Tea-Mug has an extra large drink opening.

You can also pour your tea into a tea cup or directly enjoy out of the Thermo-Tea-Bottle. Very convenient: Due to the detachable tea strainer insert several re-steeps are possible troublefree.

Die Idee zur Gründung des amapodo.com Onlineshops kam dem leidenschaftlichen Teetrinker und Geschäftsführer der azobit GmbH, Michel Walther, schon viele Jahre zuvor. Die ersten Artikel im Shop sind Teegläser, welche auf Reisen durch die Welt entdeckt und später direkt nach Europa importiert wurden. Was aus einer fixen Idee entstand, wird nun zu einem Onlineshop mit dem ersten selbst entworfenen und produzierten Produkt,

dem doppelwandigen Thermo-Teeglas Modell #TEAFAVS. Vor allem die Füllmenge begeistert den Gründer von amapodo : Mit fast einem halben Liter Volumen, ist das Teeglas der ideale Begleiter im Büro oder der Freizeit. Solche großen Teebereiter gibt es eher selten.
